***Another Celeb
Bites our dust!
(and loved it!)***

Tony Ndoro, well known sports presenter and television personality, went on the bucket-list adventure as navigator at a national SACCS race event!

TONY NDORO

I have watched the Dakar Rally for as long as I can remember and I have always wondered what it takes to participate, let alone win a race like that. When you watch on television the cars and bikes never seem to be traveling at their optimal speed... it always somehow seems labored! I am glad to say that now I have had the rare opportunity to navigate in a similar race, television is a liar!!!

Thanks to **Nissan** and **Red-Lined** who invited me to participate in the Battlefields 400 Event in Dundee to race as a navigator next to award winning driver Terence Marsh... I now have a profound respect for the men and women who pilot these vehicles. I was first introduced to the modified Nissan Navara we were to race in a week before the event.

RED-LINED

Seeing the guys working on the cars was fascinating in itself. I got to see the safety room cage and all the other safety features that gives one confidence that no matter what happens, you will be safe and sound. At the workshop I was introduced to navigational techniques and taken for a test drive.

And what a test drive it was!!

Watching Terence manoeuvre the Nissan at break-neck speeds on dust roads, was a treat every car enthusiast should experience! I realized that the car is just a tool and the driver is the mason.

I must admit that come race-weekend, my nerves were shot and the experience was much more exhilarating than I ever imagined. First of all it was gruelling! I have no idea how the professional navigators manage to call the twist and turns at such speeds. Besides the speed, one has to deal with the bumps, humps and swerves continuously! **It's crazy in that car.**

On race day we spent 7hrs in the Nissan and the next day I felt like I had gone 8 rounds with Anthony Joshua. What an experience, but also very hard work. Your mind has to be sharp while your body needs resilience... **it's not as easy as I thought!**

One of the many highlights of the race was that Terence and I managed to rescue Dakar Rally winner Giniel De Villiers after their car overturned. How many guys get to say that?

Thanks to Nissan and Red-Lined for giving this amazing and once in lifetime opportunity!

expreso

We recently spent the day with the **Expreso Show (SABC3)** and **BFGoodrich** where we had the opportunity to give **Expreso Presenter, Graeme Richards**, the full Red-Lined Motoring Adventure experience! The day started off with a workshop/manufacturing of Dakar cars tour, followed by theory of navigating and ended with the exhilaration of putting all of this into practice in our Nissan Navara V8 race car!

These inserts will be flying in July...

International **NEWS**

Our Red-Lined Motoring Adventure team's on an Adventure in China!

The guys are busy testing, but just a few more sleeps until this **13 day race commences...**

With "Dream, Conquest and Challenge" as its slogan, the Taklimakan Rally has grown into the largest annual off-road endurance race in Asia with most of its track winding through dunes, mud, and rocks.

As the **world's second largest shifting sand desert**, Taklimakan boasts wild, magnificent landscapes, which could compete with venues of top class rally races.

GOOD LUCK BOYS!
